

Dr. Aman Kumari Dahiya is currently serving as an **Associate Professor** and **Associate Dean Infrastructure** at the Institute and has been associated with MSIT since **September 2009**.

She holds **B.E. and M.Tech. degrees in Electronics and Communication Engineering, both with distinction, an M.B.A. in Finance and a Ph.D. in Microwave Engineering**. Her research interests include Artificial Intelligence, Microwave and Millimeter-Wave Devices, Antenna Design and IoT.

Dr. Aman has published **50+ research papers**, including **09 SCIE- and 07 Scopus-indexed papers**, and has **five patents** to her credit. She has also authored books and book chapters with national and international publishers and served as a **Guest Editor/Editor for SCIE- and Scopus-indexed Springer journals**. She has contributed to an **IEEE MTT-S-sponsored research project** on “*Reconfigurable Antenna Design for Wireless Communication Devices*.”

She has undertaken several academic and institutional responsibilities, including **Faculty Representative (2020–2022) on the Governing Body of MSIT, Co-Convener of the 7th National Conference AdMet-2021 and Environmental Fest ENVA-2020, Convener of Tech Fest AVENSIS-2025, and Department Labs Coordinator**, among other responsibilities.

With her strong academic background, research expertise, administrative experience, and student-centric approach, Dr. Aman continues to contribute significantly to **teaching, research, innovation, infrastructure development, and institutional excellence**.
