

### Short Profile for website

**Name of the Faculty:** Ms. Anjali Baliyan

**Designation:** Assistant Professor (Electronics and Communication Engineering)

**Qualification:** M.Tech (ECE), B.Tech (ECE)

**Brief Summary:**

Ms. Anjali Baliyan has been actively involved in teaching and research in the areas of antenna engineering, VLSI design, and 5G communication systems. Her research focuses on MIMO, UWB, circular polarization, and fractal geometries, with an emphasis on improving bandwidth, isolation, and diversity performance. She employs simulation and verification tools including CST, ANSYS HFSS, Xilinx ISE, and ModelSim.

With multiple 2025 Scopus-indexed publications in 5G mm-wave antenna systems, she bridges theoretical electromagnetics with practical antenna fabrication and system-level wireless integration. Her areas of interest include 5G/mm-wave antenna design, MIMO antennas, UWB systems, circularly polarized antennas, fractal geometries, VLSI design, electromagnetic modelling, and wireless communication systems. She is also committed to student mentorship, hands-on workshops, and connecting academic concepts with industrial applications
